

SabiHR - Admin Dashboard: User Stories & Use Cases

Overview

This document details the complete Admin Dashboard for SabiHR, covering every section, component, data point, interaction, and edge case that a company admin encounters after logging in or completing onboarding.

The dashboard is the central hub of SabiHR and is organized into the following sections:

1. **Greeting Header** — Personalized time-based greeting with current date
2. **Complete Account Setup** — Guided setup cards for admin profile and password
3. **KPI Cards** — Four key performance indicator metrics
4. **Today's Attendance Overview** — Visual attendance summary with progress bar
5. **Recent Activity** — Chronological feed of HR events
6. **Alerts Panel** — Actionable business alerts with severity levels

US-1: Dashboard Greeting Header

As a company admin, I want to see a personalized greeting when I open the dashboard, So that I feel welcomed and can quickly see today's date for context.

Screen: Dashboard Header (/dashboard)

Display Elements:

Element	Details
Greeting text	Dynamic based on time of day
Date display	Current date in Nigerian English locale (en-NG) format

Greeting Logic:

Time Range	Greeting
00:00 – 11:59	"Good morning"
12:00 – 16:59	"Good afternoon"
17:00 – 23:59	"Good evening"

Date Format:

- Uses `Intl.DateTimeFormat("en-NG", { weekday: "long", year: "numeric", month: "long", day: "numeric" })`
- Example output: "Wednesday, 1 April 2026"

User Actions:

- This section is read-only; no interactive elements

Edge Cases:

- Greeting updates only on page load/refresh; it does not auto-update at midnight or noon
- Date reflects the browser's local timezone, not server time

US-2: Complete Account Setup

As a newly registered company admin, I **want to** complete my admin profile and set a password from the dashboard, **So that** my account is fully secured and personalized before I start managing employees.

Screen: Complete Account Setup Section (/dashboard)

Section Header:

Element	Details
Title	"Complete Account Setup"
Subtitle	"Finish setting up your admin account to get the most out of SabiHR"
Dismiss button	"X" icon in top-right corner to hide entire section

Section Behavior:

- The entire section can be permanently dismissed by clicking the "X" button
- Once dismissed, the section does not reappear for the session
- Section contains two expandable/collapsible cards

Card 1: Admin Profile

Field	Type	Placeholder	Required	Validation
First Name	text	Your first name	Yes	Must be non-empty after trimming
Last Name	text	Your last name	Yes	Must be non-empty after trimming
Phone Number	text	e.g. 08012345678	Yes	Must be non-empty after trimming

Card Display:

- User icon in a light blue circle
- "Admin Profile" title with "Set up your profile" subtitle
- Chevron icon indicates expand/collapse state (rotates on toggle)
- "Required" badge next to card title

User Actions:

- Click card header to expand/collapse the form
- Fill in first name, last name, and phone number
- Click "Save & Continue" to submit

Success Flow:

1. User expands the Admin Profile card
2. Fills in all three required fields
3. Clicks "Save & Continue"
4. Button shows loading spinner with "Saving..." text

- 5. Mock async submission processes (800ms delay)
- 6. Card collapses and is marked as complete
- 7. Set Password card auto-expands (if not already completed)

Error States:

- Empty First Name → "First name is required"
- Empty Last Name → "Last name is required"
- Empty Phone Number → "Phone number is required"
- Errors display as red text below the respective field
- Errors clear when the user modifies the field

Card 2: Set Password

Field	Type	Placeholder	Required	Validation
Password	password (toggleable)	Enter a strong password	Yes	Minimum 8 characters
Confirm Password	password (toggleable)	Confirm your password	Yes	Must match password field

Password Strength Indicator:

Strength Level	Visual	Label	Color
Level 1	1 of 5 bars filled	Weak	Red (bg-red-500)
Level 2	2 of 5 bars filled	Fair	Orange (bg-orange-500)
Level 3	3 of 5 bars filled	Good	Yellow (bg-yellow-500)
Level 4	4 of 5 bars filled	Strong	Emerald (bg-emerald-500)
Level 5	5 of 5 bars filled	Very Strong	Emerald (bg-emerald-600)

Strength Calculation Criteria:

- Base score starts at 0
- +1 for length ≥ 8 characters
- +1 for containing lowercase letter
- +1 for containing uppercase letter
- +1 for containing a digit
- +1 for containing a special character

Card Display:

- Lock icon in a light blue circle
- "Set Password" title with "Secure your account" subtitle
- Chevron icon for expand/collapse
- "Required" badge next to card title
- Eye/EyeOff toggle icon for each password field

User Actions:

- Click card header to expand/collapse the form

- Enter password with real-time strength feedback
- Toggle password visibility with the eye icon
- Enter confirmation password
- Click "Save & Continue" to submit

Success Flow:

1. User expands the Set Password card
2. Enters a password (strength bar updates in real-time)
3. Enters matching confirmation password
4. Clicks "Save & Continue"
5. Button shows loading spinner with "Saving..." text
6. Mock async submission processes (800ms delay)
7. Card collapses and is marked as complete
8. Entire setup section can now be dismissed or is visually complete

Error States:

- Password less than 8 characters → "Password must be at least 8 characters"
- Passwords don't match → "Passwords do not match"
- Errors display as red text below the respective field
- Errors clear when the user modifies the field

US-3: Key Performance Indicators (KPI Cards)

As a company admin, I want to see key HR metrics at a glance on my dashboard, So that I can quickly assess the health of my organization without navigating to separate modules.

Screen: KPI Cards Section (/dashboard)

Layout:

- Responsive grid: 2 columns on mobile, 4 columns on desktop (`grid-cols-2 sm:grid-cols-2 lg:grid-cols-4`)
- Gap spacing: 16px (`gap-4`)

KPI Cards (4 total):

#	Metric	Value	Change	Direction	Icon	Color Theme
1	Total Employees	156	+5.2%	Up (↑)	Users	Blue (text-blue-600, bg-blue-50)
2	Payroll Cost	₦45.2M	+2.1%	Up (↑)	Banknote	Emerald (text-emerald-600, bg-emerald-50)
3	Attendance Rate	94.2%	+1.3%	Up (↑)	Clock	Violet (text-violet-600, bg-violet-50)
4	Turnover Rate	3.1%	-0.8%	Down (↓)	TrendingDown	Amber (text-amber-600, bg-amber-50)

Card Layout (per card):

Element	Position	Style
Icon	Top-left, inside colored circle	16x16px icon in 32x32px rounded-full container
Label	Below icon	12px, medium weight, muted foreground color
Value	Below label	24px, semibold, foreground color
Trend indicator	Bottom row	Colored text with arrow icon and percentage
Comparison text	After trend	"vs last month" in muted foreground, 12px

Trend Color Logic:

Change Type	Arrow	Text Color
Up (positive metric)	↑ (TrendingUp)	Emerald (text-emerald-600)
Down (negative metric like turnover)	↓ (TrendingDown)	Emerald (text-emerald-600)

Note: For turnover rate, a downward trend is positive (green), as lower turnover is desirable.

User Actions:

- This section is read-only; no interactive elements
- Cards are not clickable and do not navigate to detail pages

Data Source:

- Mock data from `DASHBOARD_KPI` in `src/lib/dashboard-data.ts`
- No live API integration; values are static

US-4: Today's Attendance Overview

As a company admin, I want to see a visual breakdown of today's attendance, So that I can quickly identify attendance issues and take action if needed.

Screen: Attendance Overview Section (/dashboard)

Section Header:

Element	Details
Title	"Today's Attendance"
Style	Full-width card with rounded border

Visual Progress Bar:

A horizontal stacked bar that visually represents the proportion of each attendance status:

Segment	Color	Percentage	Position
Present	Green (#00bc7d)	82.1%	Left-most

Late	Orange (#fe9a00)	7.7%	Second
Absent	Red (#fb2c36)	5.1%	Third
On Leave	Blue (#2b7fff)	5.1%	Right-most

Bar Rendering:

- Total bar height: 10px (`h-2.5`)
- Rounded corners on container (`rounded-full`)
- First segment has left rounding, last segment has right rounding
- Minimum width ensured for each segment to remain visible

Stat Cards (4 total):

#	Status	Count	Percentage	Border Color	Dot Color
1	Present	128	82.1%	Green (border-[#00bc7d])	Green
2	Late	12	7.7%	Orange (border-[#fe9a00])	Orange
3	Absent	8	5.1%	Red (border-[#fb2c36])	Red
4	On Leave	8	5.1%	Blue (border-[#2b7fff])	Blue

Stat Card Layout (per card):

Element	Details
Colored left border	2px left border in status color
Status dot	8px colored circle
Status label	12px, muted foreground
Count	24px, semibold
Percentage	12px, muted foreground, shown next to count

Layout:

- Responsive grid: 2 columns on mobile, 4 columns on desktop (`grid-cols-2 sm:grid-cols-4`)
- Gap spacing: 16px

Percentage Calculation:

- `percentage = (statusCount / total) * 100`
- Total employees: 156
- Present (128) + Late (12) + Absent (8) + On Leave (8) = 156

User Actions:

- This section is read-only; no interactive elements
- Cards are not clickable

Data Source:

- Mock data from `ATTENDANCE_SUMMARY` in `src/lib/dashboard-data.ts`

US-5: Recent Activity Feed

As a company admin, I want to see a feed of recent HR events and activities, So that I can stay informed about what's happening across the organization without checking each module individually.

Screen: Recent Activity Panel (/dashboard)

Section Header:

Element	Details
Title	"Recent Activity"
Container	Card with rounded border, left column of two-column layout

Activity Items (6 total):

#	Type	Icon	Icon Color	Employee	Description	Timestamp
1	New Hire	UserPlus	Blue (text-blue-600, bg-blue-50)	Adebayo Ogunlesi	Joined as Senior Developer	2 hours ago
2	Leave Approved	CalendarCheck	Emerald (text-emerald-600, bg-emerald-50)	Chioma Nwosu	Annual leave approved (Mar 3-7)	3 hours ago
3	Payroll Processed	DollarSign	Violet (text-violet-600, bg-violet-50)	—	February payroll for 156 employees	Yesterday
4	Leave Requested	CalendarClock	Amber (text-amber-600, bg-amber-50)	Emeka Eze	Requested 3 days sick leave	Yesterday
5	Document Generated	FileCheck	Cyan (text-cyan-600, bg-cyan-50)	Fatima Ibrahim	Confirmation letter generated	2 days ago
6	Probation Ending	AlertTriangle	Orange (text-orange-600, bg-orange-50)	Oluwaseun Adeyemi	Probation ends in 7 days	2 days ago

Activity Types and Icon Mapping:

Activity Type	Lucide Icon	Background	Text Color
new_hire	UserPlus	bg-blue-50	text-blue-600
leave_approved	CalendarCheck	bg-emerald-50	text-emerald-600
leave_requested	CalendarClock	bg-amber-50	text-amber-600
payroll_processed	DollarSign	bg-violet-50	text-violet-600
document_generated	FileCheck	bg-cyan-50	text-cyan-600
probation_ending	AlertTriangle	bg-orange-50	text-orange-600
employee_exit	UserPlus	bg-red-50	text-red-600

Activity Item Layout:

Element	Position	Style
Icon	Left, inside colored circle	16x16px icon in 36x36px rounded-full container
Employee name	Top-right of icon	14px, medium weight, foreground color
Description	Below employee name	14px, muted foreground
Timestamp	Below description	12px, muted foreground

User Actions:

- Hover over activity items (subtle hover background effect)
- Activity list is scrollable if content overflows
- Items are not clickable and do not navigate to detail pages

Data Source:

- Mock data from `RECENT_ACTIVITIES` in `src/lib/dashboard-data.ts`
- Timestamps are static strings (not computed relative to current time)

Edge Cases:

- If the activity type is unrecognized, it falls back to a default icon style
- Activity list does not paginate; all 6 items are rendered

US-6: Alerts Panel

As a company admin, I want to see actionable alerts about pending HR tasks and deadlines, So that I can prioritize urgent items and never miss critical compliance deadlines.

Screen: Alerts Panel (`/dashboard`)

Section Header:

Element	Details
---------	---------

Title	"Alerts"
Container	Card with rounded border, right column of two-column layout

Alert Items (4 total):

#	Severity	Title	Description	Icon	Color Theme
1	Warning	3 Probation Reviews Due	Three employees have probation reviews due within 14 days	AlertTriangle	Amber
2	Info	Payroll Due in 5 Days	March payroll deadline is March 3rd. Ensure attendance data is updated	Info	Blue
3	Warning	Low Leave Balances	2 employees have exhausted their annual leave balance	AlertTriangle	Amber
4	Urgent	Pension Remittance Overdue	February pension contributions have not been remitted. Due date was Feb 20th	AlertCircle	Red

Severity Levels and Styling:

Severity	Icon	Border Color	Icon Color	Background
info	Info	Blue (border-blue-200)	Blue (text-blue-600)	Light blue (bg-blue-50)
warning	AlertTriangle	Amber (border-amber-200)	Amber (text-amber-600)	Light amber (bg-amber-50)
urgent	AlertCircle	Red (border-red-200)	Red (text-red-600)	Light red (bg-red-50)

Alert Item Layout:

Element	Position	Style
Icon	Left, inside colored circle	16x16px icon in styled container
Title	Top-right of icon	14px, medium weight, foreground color
Description	Below title	12px, muted foreground
Dismiss button	Far right	"X" icon, appears on each alert

User Actions:

- Click "X" on any alert to dismiss it
- Dismissed alerts are removed from the list immediately
- Dismissed alerts do not reappear during the session

Success Flow (Dismissing an Alert):

1. User clicks the "X" button on an alert
2. Alert is removed from the visible list
3. Remaining alerts reflow to fill the space
4. If all alerts are dismissed, empty state is shown

Empty State:

- Displayed when all alerts have been dismissed
- Message: "No alerts at this time" (or similar placeholder)
- No action buttons in empty state

Edge Cases:

- Alerts are managed via local React state; dismissals are not persisted to localStorage or API
- On page refresh, all 4 alerts reappear
- Alert order is static; urgent alerts are not automatically sorted to the top

Data Source:

- Mock data from `DASHBOARD_ALERTS` in `src/lib/dashboard-data.ts`

US-7: Headcount Trend Chart (Available Component)

As a company admin, I want to see the employee headcount trend over the past several months, So that I can understand hiring velocity and workforce growth patterns.

Component: Headcount Chart (`src/components/dashboard/headcount-chart.tsx`)

Note: This component is built but not currently rendered on the main dashboard page.

Chart Type: Area chart (Recharts library)

Data Series (6 months):

Month	Employee Count
Sep	134
Oct	139
Nov	142
Dec	145
Jan	150
Feb	156

Chart Configuration:

Property	Value
Height	220px
Line color	Blue (#2563eb)
Line width	2px

Fill	Linear gradient from #2563eb (15% opacity) to transparent
Gradient ID	headcountGradient
Grid style	Dashed lines (strokeDasharray: "3 3")
Margins	Top: 5, Right: 5, Left: -20, Bottom: 0
Y-axis domain	[dataMin - 10, dataMax + 5]

Visual Elements:

- Smooth area fill with gradient
- Interactive tooltip on hover showing month and count
- X-axis: month labels
- Y-axis: employee count (auto-scaled)
- Responsive container that adapts to parent width

User Actions:

- Hover over chart to see tooltip with exact values
- Chart is not clickable

Data Source:

- Mock data from `HEADCOUNT_TREND` in `src/lib/dashboard-data.ts`

US-8: Department Distribution Chart (Available Component)

As a company admin, I want to see how employees are distributed across departments, So that I can identify staffing imbalances and plan resource allocation.

Component: Department Chart (`src/components/dashboard/department-chart.tsx`)

Note: This component is built but not currently rendered on the main dashboard page.

Chart Type: Horizontal bar chart (Recharts library)

Department Data (8 departments):

#	Department	Employee Count	Bar Color
1	Engineering	42	Blue (#2563eb)
2	Sales	28	Green (#10b981)
3	Marketing	22	Amber (#f59e0b)
4	Finance	18	Purple (#8b5cf6)
5	HR	15	Pink (#ec4899)
6	Operations	14	Cyan (#06b6d4)
7	Legal	9	Slate (#64748b)
8	IT	8	Orange (#f97316)

Chart Configuration:

Property	Value
Height	220px
Bar size	16px height
Bar radius	[0, 4, 4, 0] (rounded right side)
Y-axis	Department names, width 85px
Layout	Vertical (horizontal bars)
Margins	Top: 0, Right: 20, Left: 0, Bottom: 0

Visual Elements:

- Color-coded horizontal bars, one per department
- Department name label on Y-axis
- Employee count on X-axis
- Interactive tooltip on hover
- Responsive container

User Actions:

- Hover over bars to see tooltip with exact count
- Chart is not clickable

Data Source:

- Mock data from `DEPARTMENT_BREAKDOWN` in `src/lib/dashboard-data.ts`

US-9: Dashboard Sidebar Navigation

As a company admin, I want to navigate between SabiHR modules from a persistent sidebar, So that I can quickly access any feature of the HR platform from any page.

Component: Sidebar Navigation

Navigation Sections (5 groups):

Section	Items	Icons
Main	Dashboard	LayoutDashboard
People	Employees, Departments	Users, Building2
Time & Pay	Attendance, Leave, Payroll	Clock, CalendarDays, Banknote
Operations	Documents, Document Library, Assets	FileText, FolderOpen, Package
More	Announcements, Reports, Settings	Megaphone, BarChart3, Settings

Payroll Sub-items (9 total):

Sub-item	Path
Run Payroll	/payroll/run
Payroll History	/payroll/history
Salary Structure	/payroll/salary
Tax (PAYE)	/payroll/tax
Pension	/payroll/pension
NHF	/payroll/nhf
NSITF	/payroll/nsitf
ITF	/payroll/itf
Bonuses & Deductions	/payroll/bonuses

Navigation Behavior:

- Active page is highlighted in the sidebar
- Clicking a nav item navigates to the corresponding route
- Payroll section expands to show sub-items
- Sidebar is persistent across all dashboard pages

Data Source:

- Mock data from `NAV_SECTIONS` in `src/lib/dashboard-data.ts`

Complete Dashboard Layout Map

```
/dashboard
|
+-- Greeting Header
|   |-- Dynamic greeting ("Good morning/afternoon/evening")
|   |-- Current date in Nigerian format
|
+-- Complete Account Setup (dismissible)
|   |-- Admin Profile Card (expandable)
|       |-- First Name, Last Name, Phone Number

|       |-- 🚨 Pension Remittance Overdue (urgent)

```

Data Structures

KPI Card Data

```

interface KpiCardData {
  label: string;           // e.g. "Total Employees"
  value: string;           // e.g. "156" or "¥45.2M"
  change: number;          // e.g. 5.2 or -0.8
  changeType: "up" | "down";
  icon: LucideIcon;        // Users, Banknote, Clock, TrendingDown
  color: string;           // Tailwind text color class
  bgColor: string;         // Tailwind background color class
}

```

Attendance Summary

```

interface AttendanceSummary {
  present: number;         // 128
  absent: number;          // 8
  late: number;            // 12
  onLeave: number;         // 8
  total: number;           // 156
}

```

Recent Activity

```

type ActivityType =
  | "new_hire"
  | "leave_approved"
  | "leave_requested"
  | "payroll_processed"
  | "document_generated"
  | "probation_ending"
  | "employee_exit";

interface RecentActivity {
  id: string;
  type: ActivityType;
  description: string; // e.g. "Joined as Senior Developer"
  employee: string; // e.g. "Adebayo Ogunlesi"
  timestamp: string; // e.g. "2 hours ago"
}

```

Dashboard Alert

```

type AlertSeverity = "warning" | "info" | "urgent";

interface DashboardAlert {
  id: string;
  severity: AlertSeverity;
  title: string; // e.g. "Pension Remittance Overdue"
  description: string; // e.g. "February pension contributions have not been
remitted..."
}

```

Headcount Trend

```

interface HeadcountTrend {
  month: string; // e.g. "Sep"
  count: number; // e.g. 134
}

```

Department Breakdown

```

interface DepartmentBreakdown {
  name: string; // e.g. "Engineering"
  count: number; // e.g. 42
  color: string; // e.g. "#2563eb"
}

```

Navigation

```
interface NavItem {
  label: string;
  icon: LucideIcon;
  path: string;
  children?: { label: string; path: string }[];
}

interface NavSection {
  title: string;
  items: NavItem[];
}
```

State Management

State	Scope	Persistence	Details
Setup section dismissed	Component (useState)	Session only	Reappears on page refresh
Setup card expanded/collapsed	Component (useState)	Session only	Default: first incomplete card is expanded
Setup card completed	Component (useState)	Session only	Completion is not saved to localStorage or API
Admin profile form data	Component (useState)	None	Lost on page navigation or refresh
Password form data	Component (useState)	None	Lost on page navigation or refresh
Dismissed alerts	Component (useState)	Session only	All alerts reappear on page refresh
Greeting text	Computed on render	N/A	Based on new Date().getHours()
Current date	Computed on render	N/A	Based on new Date() with locale formatting

Responsive Behavior

Breakpoint	KPI Grid	Attendance Grid	Activity/Alerts Layout
Mobile (< 640px)	2 columns	2 columns	Single column (stacked)
Tablet (640px – 1023px)	2 columns	4 columns	Single column (stacked)
Desktop (≥ 1024px)	4 columns	4 columns	2 columns (side by side)

Max Width: All dashboard content is constrained to `max-w-[1400px]` with auto horizontal margins.

Integration Notes

- **No server persistence yet:** All data is mock — KPI values, attendance counts, activities, and alerts are not fetched from an API
- **No real-time updates:** Dashboard does not poll or use WebSockets; data is static until page refresh
- **Charts available but unused:** `headcount-chart.tsx` and `department-chart.tsx` are built components not yet placed in the dashboard layout
- **Sidebar navigation:** Defined in `NAV_SECTIONS` mock data; routing is handled by React Router
